Andrew Kirk

IT Systems Administration | Cybersecurity | Workforce Development

Camarillo, CA | andrew@fixitkirk.com | LinkedIn | fixitkirk.com

My background spans systems administration, IT support, cybersecurity, and workforce development. At NAVAIR, I serve as the Workforce Development Department's cybersecurity subject matter expert and help teams use workforce data to plan training and support career development.

My experience also includes approving training, user accounts, and physical access.

Experience

Human Resources Specialist, Training Specialist

NAVAIR | October 2019 - Present

- Serve as the cybersecurity subject matter expert for the Workforce Development Department and review and approve IT equipment for learning spaces.
- Identify and prioritize employee development needs for current and future fiscal years. Support career development, education, and training from orientation through retirement.
- Interpret workforce data to inform human capital planning, develop long-term workforce development strategies, and prioritize needs across stakeholder groups.
- Coach stakeholders on workforce planning.
- Develop project execution strategies aligned with command priorities and spending timelines. Oversee logistics, administration, and budgeting, evaluate results, and adjust plans as needed.
- Assign tasks and balance workloads based on workflow demands and team members' skill levels.

Systems Administrator

Smartronix/Jacobs (Contractor) | March 2019 - October 2019

- Coordinated campus wireless integration and served as a liaison among vendors, instructors, and training specialists.
- Supported classroom training with Navy-specific, job-specific, and general-purpose software.
- Managed classroom schedules, set up and took down equipment, and maintained the IT asset inventory.
- Reported IT issues, classroom procurement matters, and user feedback to management. Suggested improvements to technology and classroom operations.

Lead IT Help Desk Student Assistant

California State University Channel Islands CSUCI | June 2017 - January 2019

- Provided IT support to students, faculty, staff, and visitors. Troubleshot campus network and shared-drive access and assisted with user account management.
- Created, tracked, and resolved IT incidents through a ticketing system.
- Installed software and hardware, including PCs, printers, and Internet of Things (IoT) devices.

Education

California Lutheran University | November 2023 - Present

Master of Science, Information Technology - Cybersecurity

Naval Postgraduate School | December 2023
